THIS IS UNEVALUATED INFORMATION

1. A certain Boris Urbancic, from Ljubljana, was appointed Director of the Dravograd Power Plant in July 1949. Formerly chief of personnel in the ELZAP (Elektrifikacija Zapada - Western Electrification) Directorate in Ljubljana, he is 28 years old and a member of the Yugoslav Communist Party. Urbancic has also taken over the personnel department of the power plant because the former personnel clerk, Nadj Beganovic, a 24-year old Bosnian, was transferred as personnel clerk on 1 September to the Mariborski Otok Power Plant.
2. During the first part of September, one transformer in the plant was destroyed by fire, reportedly as the result of an act of sabotage. Following this incident, several persons were arrested and the plant was placed under heavy military guard. A certain Sene (fnu), chief manager of the plant, was also arrested and has not yet been released.
3. The aggregate (sic; turbine-alternator ?) which had been under repair since the summer of 1949 is currently in operation.
4. The 110 KV. overhead transmission line between Mariborski Otok and Dravograd is still under construction.
